

Feature Ticket List (Development Backlog)

System Documentation | IRVision AI

1. Completed Development Tickets

Ticket ID	Task Title	Priority	Status
TICKET-101	Implement JWT & Google OAuth Credentials	High	Completed
TICKET-102	forgot-password OTP email flow via SMTP	High	Completed
TICKET-103	SSE Process Stream & Upload Page	High	Completed
TICKET-104	High-Performance OpenCV Image Pipeline	High	Completed
TICKET-105	Dynamic Hostname API Client Router	High	Completed
TICKET-106	Interactive Split Sliders & Zoom Viewers	Medium	Completed
TICKET-107	Report PDF Print Generator in ResultPage	Medium	Completed
TICKET-108	CPU Thread Memory Safeguards & OOM Fix	High	Completed

2. Future Roadmap / Backlog Tickets

- **TICKET-201: Batch IR Image Processing:** Allow users to drag multiple files (up to 10) and queue them in the backend pipeline.
- **TICKET-202: Custom False-Color Palettes:** Let scientists configure color map colors manually from a custom canvas dashboard.
- **TICKET-203: Exif Geographical Metadata Parser:** Parse GIS latitude/longitude info from TIFF files and plot them directly on a leaflet map view.
