

IP Infringement Policy Document

System Documentation | IRVision AI

1. Protection of Intellectual Property

IRVision AI respects intellectual property rights and expects its users to do the same. All proprietary code, custom OpenCV scripts, system UI animations, logo designs, and system architectures are protected by copyright and patent laws.

2. Usage of Satellite Datasets

All input satellite datasets uploaded to the system are assumed to be public domain or owned/licensed by the uploading scientist. IRVision AI claims no ownership over user-uploaded input imagery.

3. Reporting Copyright Infringements

If you believe that any image colorization output or remote sensing representation hosted on our servers infringes your copyright, please submit a take-down request to the administration team containing:

- Identification of the copyrighted work claimed to have been infringed.
- The URL or resource ID of the infringing asset on our server.
- Your contact information (email, phone number, and physical signature).

4. Repeat Violators Policy

Accounts found to repeatedly upload unlicensed commercial satellite imagery without authorization will be permanently terminated.
